## Fort Monmouth Radiological Studies

Stephen Luftig, Deputy Director  
Emergency & Remedial Response Division

Paul A. Giardina, Regional Radiation Representative  
Air & Waste Management Division

We are requesting your review of the attached five radiological studies sent to us by the Fort Monmouth facility. These studies were sent to us as verification for clean-up of radiation spills at the site. Potential problems at this site came to our attention at a recent briefing of the Regional Administrator to a State of New Jersey Senate Subcommittee investigating federal facilities. Please review the studies for adequacy by January 29, 1986. We would like to verify this cleanup so that we might report back to the New Jersey Subcommittee.

I have attached the document "Installation Assessment of Fort Monmouth Report No. 171" to provide you with background information on the spills.

If you have any questions, feel free to contact Helen Shannon of my staff at x 4706.

Your cooperation in this matter is much appreciated.
